How to measure yourself to get the right size.

1. Measure around the chest below the armhole. Don't pull the tape too tight
2. Add 5cm to your measurement
3. EXAMPLE- your measurement equals 98cm, plus 5cm = **103cm**.
4. Then compare your result to the **ACTUAL CHEST MEASUREMENT**
5. The closest garment would be the size 18 which has an Actual Chest of **102cm**.
